

SETTING BEST PRACTICE AS THE STANDARD WITH NATIONAL TRAINING

Customised AQF Cert IV and Diploma Project Management program

- Boral Bespoke Training
- Boral Construction Materials
- Customised Training Program

Boral is Australia's largest construction materials and building projects supplier. With a mandate to upskill their workforce in Project Management, they engaged LogiKal to customise and deliver a Project Management capability program aligned with Boral's internal process and PMI's PMBOK® industry best practice methodology.

The Challenge

Boral's project management processes and procedures were outdated and did not align with industry best practice. The challenge was to develop a project management program that was tailored to Boral's internal processes and aligned with industry best practice methodology.

The challenge was to:

- Develop a project management program that was tailored to Boral's internal processes and aligned with industry best practice methodology
- Incorporate Boral's internal processes and procedures into the program
- Incorporate Boral's internal processes and procedures into the program
- Incorporate Boral's internal processes and procedures into the program

LogiKal's Approach

LogiKal's team ran a series of workshops with Boral's subject matter experts to understand their internal processes and procedures and to identify the key areas for improvement.

The Solution

LogiKal's team worked closely with Boral's subject matter experts to develop a project management program that was tailored to Boral's internal processes and aligned with industry best practice methodology. The program was delivered through a series of workshops and training sessions.

The Outcome

- Over 200+ staff trained at Boral's facilities around Australia
- Project management processes and procedures updated and aligned with industry best practice methodology
- Project management program delivered through a series of workshops and training sessions

The program was delivered through a series of workshops and training sessions. The program was tailored to Boral's internal processes and aligned with industry best practice methodology.
