

# TRAINING & CAPABILITY MAIN ROADS, WA

## Customised PMBOK® based Project Management Capability Enhancement Programme

**Project:** Customised PMBOK® based  
Project Management Capability  
Enhancement Programme

**Participants:** Technically diverse

LogiKal was awarded a tender by Main Roads, Western Australia and subsequently engaged to develop, deliver and evaluate an accredited, PMBOK® based, Project Management program aligned to AQTF standards.

## LogiKal's Approach

Main Roads, Western Australia's Project Management programme was customised to include a MRWA flavour and aimed at improving Project Management organisational capability by enhancing employee's knowledge and skills of Project Management methodology, process and practical application in the workplace. The scope of the project included:

- Phase 1 - LogiKal conducted a requirement capture with the client to understand inclusions within the programme and the basis for customisation.
- Phase 2 – Course development and customisation which also included integrating client templates where appropriate into the assessable component of the programme.
- Phase 3 – LogiKal delivered 3 programs to date including two Diploma and one Cert IV in Project Management Practice training programme's.
- Phase 4 - Ongoing Cultural Embedment, assessing and supporting employees to implement their learnings from the program.

## LogiKal's Value-add

LogiKal worked closely with the Project Services Manager to ensure the programme was aligned to the Main Roads Way of delivering projects.

Successful outcomes included:

- Increased capability by training 48 employees from multiple geographic locations.
- Ongoing embedment through assessments and post training reviews.

The delivery of increased organisational capability was well received.
