

SETTING BEST PRACTICE AS THE STANDARD WITH NATIONAL TRAINING

CLIENT: BORAL CONSTRUCTION MATERIALS
DURATION: 2015 – 2024

LOGIKAL'S INVOLVEMENT

Boral is Australia's largest construction materials and building projects supplier. With a mandate upskill their workforce in Project Management, they engaged LogiKal to customise and deliver a Project Management capability program aligned with Boral's internal process and PMI's PMBOK® industry best practice methodology.

CHALLENGES

To improve national delivery and capability, Boral Australia needed to ensure employees understood their role in projects. The program was to cover a technically diverse audience, from tradies on the tools right up to GM level to create a standardised knowledge of project management and consistency approach.

LOGIKAL'S APPROACH

LogiKal's team ran a series of requirements capture workshops with Boral's subject matter experts to customise the units of competency and align training to meet Boral's needs. LogiKal's approach was to:

- Develop and roll out a bespoke, accredited training program to meet an intensive delivery schedule
- Customise the Procurement, Quality and Risk modules to align with Boral internal processes
- Incorporate Boral's internal policies, procedures, templates and tools into the program
- Meet the needs of a technically diverse workforce with different skill levels and experience.

CUSTOMISED BORAL BESPOKE TRAINING PROGRAM: A COMPREHENSIVE OVERVIEW

ACHIEVEMENTS

Over 220 + staff trained at Boral's facilities in multiple locations including NSW, VIC, WA and QLD.

Recognition of competency in Project Management through tailored assessments.

Regular post training reviews with LogiKal's training team to gauge student progress and application of new Project Management skills in the workplace.

The delivery of increased organisational capability has been well received with LogiKal receiving positive feedback from both sponsors and stakeholders.
